Liability and indemnity
19. Complaints
20. Home-to-school transport
21. Defibrillators

Statement of intent

The governing board of Carr Infant School has a duty to ensure arrangements are in place to support pupils with medical conditions. The aim of this policy is to ensure that all pupils with medical conditions, in terms of both physical and mental health, receive appropriate support allowing them to play a full and active role in school life, remain healthy, have full access to education (including school trips and physical education) and achieve their academic potential.

Carr Infant School believes it is important that parents/carers of pupils with medical conditions feel confident that the school provides effective support for their child's medical condition, and that pupils feel safe in the school environment.

There are also social and emotional implications associated with medical conditions. Pupils with medical conditions can develop emotional disorders, such as self-consciousness, anxiety and depression, and be subject to bullying. This policy aims to minimise the risks of pupils experiencing these difficulties.

Long-term absences because of medical conditions can affect educational attainment, impact integration with peers, and affect wellbeing and emotional health. This policy contains procedures to minimise the impact of long-term absence and effectively manage short-term absence.

Some pupils with medical conditions may be considered to be disabled under the definition set out in the Equality Act 2010. The school has a duty to comply with the Act in all such cases.

In addition, some pupils with medical conditions may also have SEND and have an education, health and care (EHC) plan collating their health, social and SEND provision. For these pupils, compliance with the DFE's 'Special educational needs and disability code of practice: 0 to 25 years' and the school's SEND Policy will ensure compliance with legal duties.

To ensure that the needs of our pupils with medical conditions are fully understood and effectively supported, we consult with health and social care professionals, pupils and their parents/carers.

1. Legal framework

1.1. This policy has due regard to legislation including, but not limited to, the following:

- The Children and Families Act 2014
- The Education Act 2002
- The Education Act 1996 (as amended)
- The Children Act 1989
- The National Health Service Act 2006 (as amended)
- The Equality Act 2010
- The Health and Safety at Work etc. Act 1974
- The Misuse of Drugs Act 1971
- The Medicines Act 1968
- The School Premises (England) Regulations 2012 (as amended)
- The Special Educational Needs and Disability Regulations 2014 (as amended)
- The Human Medicines (Amendment) Regulations 2017

1.2. This policy has due regard to the following guidance:

- DFE (2015) 'Special educational needs and disability code of practice: 0-25 years'
- DFE (2015) 'Supporting pupils at school with medical conditions'
- DFE (2000) 'Guidance on first aid for schools'
- Ofsted (2015) 'The common inspection framework: education, skills and early years'
- Department of Health (2017) 'Guidance on the use of adrenaline auto injectors in schools'

1.3. This policy has due regard to the following school policies:

- Managing Medicines Policy
- SEND Policy
- Drug and Alcohol Policy
- Complaints Procedure Policy

2. The role of the governing board

2.1. The governing board:

- Is legally responsible for fulfilling its statutory duties under legislation.
- Ensures that arrangements are in place to support pupils with medical conditions.
- Ensures that pupils with medical conditions can access and enjoy the same opportunities as any other pupil at the school.
- Works with the LA, health professionals, commissioners and support services to ensure that pupils with medical conditions receive a full education.

- Ensures that, following long-term or frequent absence, pupils with medical conditions are reintegrated effectively.
- Ensures that the focus is on the needs of each pupil, and what support is required to support their individual needs.
- Instils confidence in parents/carers and pupils in the school's ability to provide effective support.
- Ensures that all members of staff are properly trained to provide the necessary support and are able to access information and other teaching support materials as needed.
- Ensures that no prospective pupil is denied admission to the school because arrangements for their medical condition have not been made.
- Ensures that pupils' health is not put at unnecessary risk. As a result, the board holds the right to not accept a pupil into school at times where it would be detrimental to the health of that pupil or others to do so, such as where the child has an infectious disease.
- Ensures that policies, plans, procedures and systems are properly and effectively implemented.

3. The role of the Headteacher

3.1. The Headteacher:

- Ensures that this policy is effectively implemented with stakeholders.
- Ensures that all staff are aware of this policy and understand their role in its implementation.

3.2 The SENCo:

- Ensures that a sufficient number of staff are trained and available to implement this policy and deliver against all individual healthcare plans (IHPs), including in emergency situations.
- Has overall responsibility for the development of IHPs.
- Contacts the school nursing service where a pupil with a medical condition requires support that has not yet been identified.

4. The role of parents/carers

4.1. Parents/carers:

- Notify the school if their child has a medical condition.
- Provide the school with sufficient and up-to-date information about their child's medical needs.
- Are involved in the development and review of their child's IHP.
- Carry out any agreed actions contained in the IHP.
- Ensure that they, or another nominated adult, are contactable at all times.

5. The role of school staff

5.1. School staff:

- May be asked to provide support to pupils with medical conditions, including the administering of medicines, but are not required to do so.
- Take into account the needs of pupils with medical conditions in their lessons when deciding whether to volunteer to administer medication.
- Receive sufficient training and achieve the required level of competency before taking responsibility for supporting pupils with medical conditions.
- Know what to do and respond accordingly when they become aware that a pupil with a medical condition needs help.

6. The role of the school nurse

6.1. The school nurse:

- At the earliest opportunity, notifies the school when a pupil has been identified as having a medical condition which requires support in school.
- Supports staff to implement IHPs and provides advice and training.
- Liaises with lead clinicians locally on appropriate support for pupils with medical conditions.

7. The role of other healthcare professionals

7.1. Other healthcare professionals, including GPs and paediatricians:

- Notify the school nurse when a child has been identified as having a medical condition that will require support at school.
- Provide advice on developing IHPs.
- May provide support in the school for children with particular conditions, E.g. asthma, diabetes and epilepsy.

8. The role of providers of health services

- 8.1. Providers of health services co-operate with the school, including ensuring communication, liaising with the school nurse and other healthcare professionals, and participating in local outreach training.

9. The role of the LA

9.1. The LA:

- Commissions school nurses for local schools.
- Promotes co-operation between relevant partners.
- Makes joint commissioning arrangements for education, health and care provision for pupils with SEND.

- Provides support, advice and guidance, and suitable training for school staff, ensuring that IHPs can be effectively delivered.
 - Works with the school to ensure that pupils with medical conditions can attend school full-time.
- 9.2. Where a pupil is away from school for 15 days or more (whether consecutively or across a school year), the LA has a duty to make alternative arrangements, as the pupil is unlikely to receive a suitable education in a mainstream school.
- 9.3. Key judgements are informed by the progress and achievement of pupils with medical conditions, alongside pupils with SEND, and also by pupils' spiritual, moral, social and cultural development.

10. Admissions

- 10.1. No child is denied admission to the school or prevented from taking up a school place because arrangements for their medical condition have not been made.

A child may only be refused admission if it would be detrimental to the health of the child to admit them into the school setting.

11. Notification procedure

- 11.1. When the school is notified that a pupil has a medical condition that requires support in school, the school nurse informs the head teacher. Following this, the school begins to arrange a meeting with parents/carers, healthcare professionals and the pupil, with a view to discussing the necessity of an IHP.
- 11.2. The school does not wait for a formal diagnosis before providing support to pupils.
Where a pupil's medical condition is unclear, or where there is a difference of opinion concerning what support is required, a judgement is made by the Headteacher based on all available evidence (including medical evidence and consultation with parents/carers).
- 11.3. For a pupil starting at the school in a September uptake, arrangements are in place prior to their introduction and informed by their previous institution.
- 11.4. Where a pupil joins the school mid-term or a new diagnosis is received, arrangements are put in place within two weeks.

12. Staff training and support

- 12.1. Any staff member providing support to a pupil with medical conditions receives suitable training.
- 12.2. Staff do not undertake healthcare procedures or administer medication without appropriate training.
- 12.3. Through training, staff have the requisite competency and confidence to support pupils with medical conditions and fulfil the requirements set out in IHPs. Staff understand the medical condition(s) they are asked to support, their implications, and any preventative measures that must be taken.

- 12.4. A first-aid certificate does not constitute appropriate training for supporting pupils with medical conditions.
- 12.5. The school nurse identifies suitable training opportunities that ensure all medical conditions affecting pupils in the school are fully understood, and that staff can recognise difficulties and act quickly in emergency situations.
- 12.6. Parents/carers of pupils with medical conditions are consulted for specific advice and their views are sought where necessary, but they will not be used as a sole trainer.

13. Individual healthcare plans (IHPs)

13.1. The school, parent/carer(s) and a relevant healthcare professional work in partnership to create and review IHPs. Where appropriate, the pupil is also involved in the process.

13.2. IHPs include the following information:

- The medical condition, along with its triggers, symptoms, signs and treatments.
- The pupil's needs, including medication (dosages, side effects and storage), other treatments, facilities, equipment, access to food and drink (where this is used to manage a condition), dietary requirements and environmental issues.
- The support needed for the pupil's educational, social and emotional needs.
- The level of support needed, including in emergencies.
- Whether a child can self-manage their medication.
- Who will provide the necessary support, including details of the expectations of the role and the training needs required, as well as who will confirm the supporting staff member's proficiency to carry out the role effectively.
- Cover arrangements for when the named supporting staff member is unavailable.
- Who needs to be made aware of the pupil's condition and the support required.
- Arrangements for obtaining written permission from parents/carers and the Headteacher for medicine to be administered by school staff or self-administered by the pupil.
- Separate arrangements or procedures required during school trips and activities.
- Where confidentiality issues are raised by the parent/carer(s) or pupil, the designated individual to be entrusted with information about the pupil's medical condition.
- What to do in an emergency, including contact details and contingency arrangements.

13.3. Where a pupil has an emergency healthcare plan prepared by their lead clinician, this is used to inform the IHP.

- 13.4. IHPs are easily accessible to those who need to refer to them, but confidentiality is preserved.
- 13.5. IHPs are reviewed on at least an annual basis, or when a child's medical circumstances change, whichever is sooner.
- 13.6. Where a pupil has an EHC plan, the IHP is linked to it or becomes part of it.
- 13.7. Where a child has SEND but does not have a statement or EHC plan, their SEND should be mentioned in their IHP.
- 13.8. Where a child is returning from a period of hospital education, alternative provision or home tuition, we work with the LA and education provider to ensure that their IHP identifies the support the child needs to reintegrate.

14. Managing medicines

- 14.1. In accordance with the school's Managing Medicines Policy, medicines are only administered at school when it would be detrimental to a pupil's health or school attendance not to do so.
- 14.2. Pupils under 16 years of age are not given prescription or non-prescription medicines without their parent/carer's written consent
- 14.3. The school only accepts medicines that are in-date, labelled, in their original container, and that contain instructions for administration, dosage and storage. The only exception to this is insulin, which must still be in-date, but is available in an insulin pen or pump, rather than its original container.
- 14.4. All medicines are stored safely.
- 14.5. When medicines are no longer required, they are returned to parents/carers for safe disposal. Sharps boxes are always used for the disposal of needles and other sharps.
- 14.6. Records are kept of all medicines administered to individual pupils – stating what, how and how much was administered, when and by whom.

15. Adrenaline auto-injectors (AAIs)

- 15.1. The administration of AAIs and the treatment of anaphylaxis will be carried out in accordance with the school's Managing Medicines Policy
- 15.2. A Register of AAIs will be kept of all the pupils who have been prescribed an AAI to use in the event of anaphylaxis. A copy of this will be held in each classroom for easy access in the event of an allergic reaction and will be checked as part of initiating the emergency response.
- 15.3. Where a pupil has been prescribed an AAI, this will be written into their IHP.

- 15.4. For pupils under the age of seven who have prescribed AAI devices, these are stored in a suitably safe and central location:
- 15.5. Designated staff members will be trained in how to administer an AAI, and the sequence of events to follow when doing so. AAI's will only be administered by these staff members.
- 15.6. Where there is any delay in contacting designated staff members, or where delay could cause a fatality, the nearest staff member will administer the AAI.
- 15.7. If necessary, other staff members may assist the designated staff members with administering AAI's, such as where the pupil needs restraining.
- 15.8. Where a pupil appears to be having a severe allergic reaction, the emergency services will be contacted even if an AAI device has already been administered.
- 15.9. In the event that an AAI is used, the pupil's parents/carers will be notified that an AAI has been administered.
- 15.10. Where any AAI's are used, the following information will be recorded
- Where and when the reaction took place
 - How much medication was given and by whom
- 15.16. AAI's will not be reused and will be disposed of according to manufacturer's guidelines following use.
- 15.17. In the event of a school trip, pupils at risk of anaphylaxis will have their own AAI with them (carried by adults).

16. Record keeping

- 16.1. Proper record keeping protects both staff and pupils, and provides evidence that agreed procedures have been followed.

17. Emergency procedures

- 17.1. Medical emergencies are dealt with under the school's emergency procedures.
- 17.2. Where an IHP is in place, it should detail:
- What constitutes an emergency
 - What to do in an emergency
- 17.3. If a pupil needs to be taken to hospital, a member of staff remains with the pupil until their parents/carers arrive.

18. Day trips, residential visits and sporting activities

- 18.1. Pupils with medical conditions are supported to participate in school trips, sporting activities and residential visits.

- 18.2. Prior to an activity taking place, the school conducts a risk assessment to identify what reasonable adjustments should be taken to enable pupils with medical conditions to participate. In addition to a risk assessment, advice is sought from pupils, parents/carers and relevant medical professionals.

19. Liability and indemnity

- 19.1. The governing board ensures that appropriate insurance is in place to cover staff providing support to pupils with medical conditions.
- 19.2. The school holds an insurance policy with Zurich Municipal Insurance covering liability relating to the administration of medication.
- 19.3. In the event of a claim alleging negligence by a member of staff, civil actions are most likely to be brought against the school, not the individual.

20. Complaints

- 20.1. Parents/carers or pupils wishing to make a complaint concerning the support provided to pupils with medical conditions are required to speak to the school in the first instance.
- 20.2. If they are not satisfied with the school's response, they may make a formal complaint via the school's complaints procedure, as outlined in the Complaints Procedure Policy.
- 20.3. If the issue remains unresolved, the complainant has the right to make a formal complaint to the DFE.
- 20.4. Parents/carers and pupils are free to take independent legal advice and bring formal proceedings if they consider they have legitimate grounds to do so.

21. Home-to-school transport

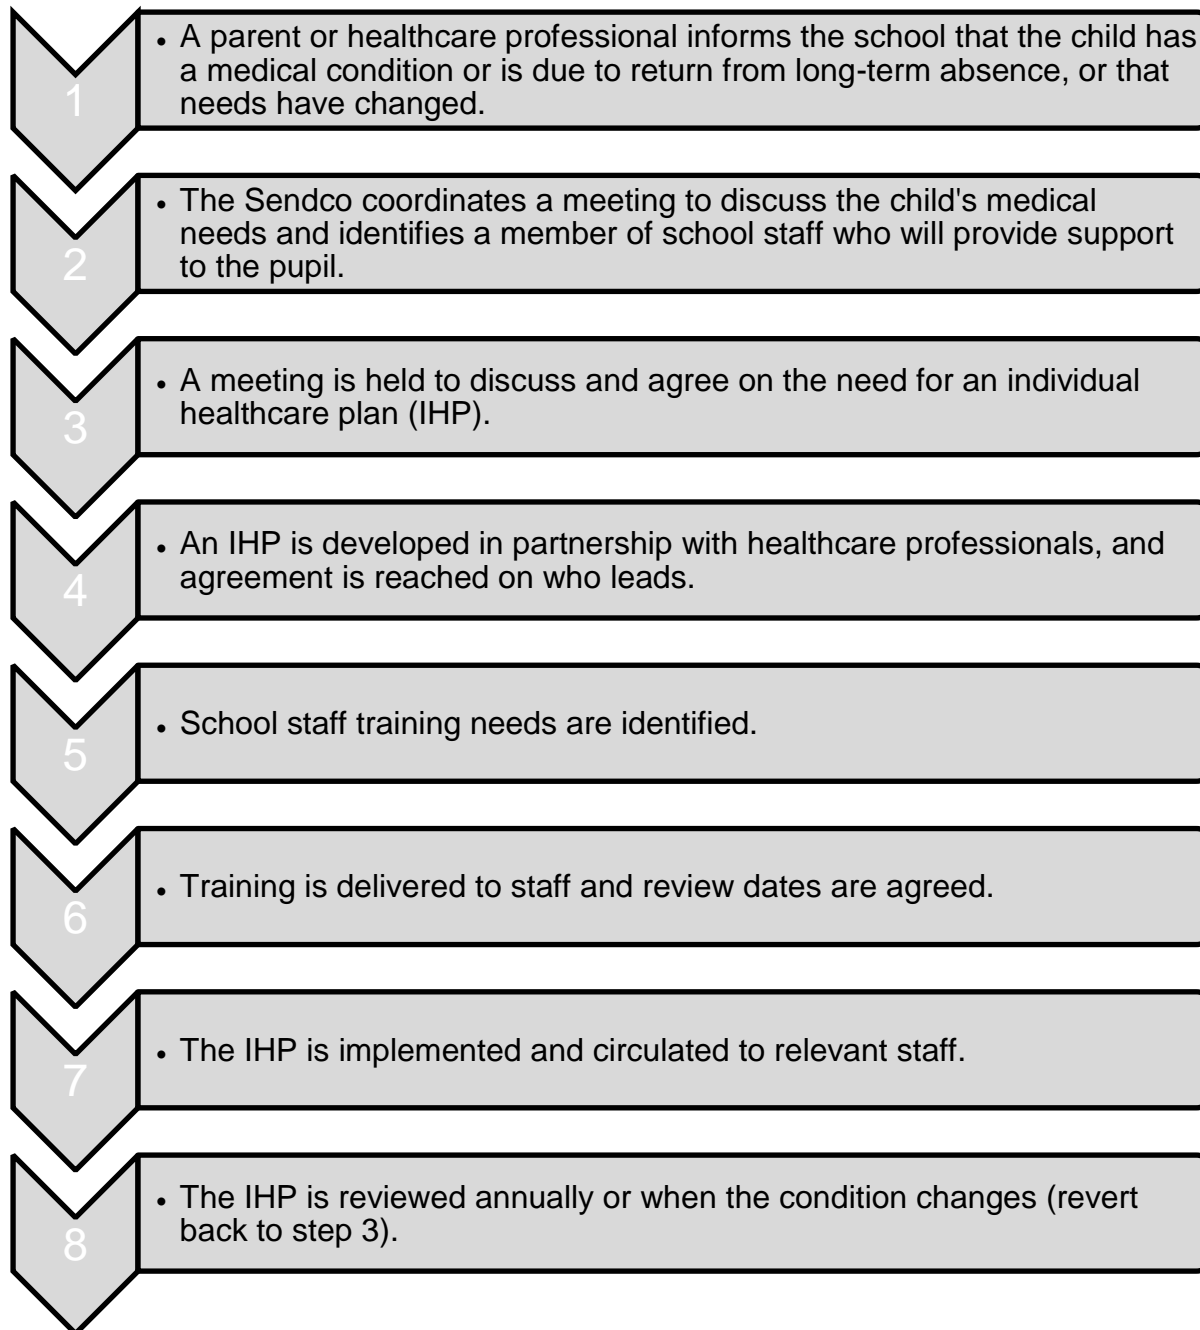

- 21.1. Arranging home-to-school transport for pupils with medical conditions is the responsibility of the LA.
- 21.2. Where appropriate, the school will share relevant information to allow the LA to develop appropriate transport plans for pupils with life-threatening conditions.

22. Defibrillators

- 22.1. The school has an automated external defibrillator (AED).
- 22.2. The AED is stored in the medical room.
- 22.3. All staff members and pupils are aware of the AED's location and what to do in an emergency.
- 22.4. No training is needed to use the AED, as voice and/or visual prompts guide the rescuer through the entire process from when the device is first switched on or opened; however, staff members are trained in cardiopulmonary resuscitation (CPR), as this is an essential part of first-aid and AED use.

22.5. The emergency services will always be called where an AED is used, or requires using.

22.6. Where possible, AEDs will be used in paediatric mode or with paediatric pads for pupils under the age of eight.

Contacting Emergency Services

To be stored by the phone in the school office

Request an ambulance – dial 999, ask for an ambulance and be ready with the information below.

Speak clearly and slowly and be ready to repeat information if asked.

- The telephone number: 01904 565140 ☐ Your name.
- Your location as follows: Carr Infant School, Ostman Road, York ☐ The satnav postcode:YO26 5QA.
- The exact location of the patient within the school.
- The name of the child and a brief description of their symptoms.
- The best entrance to use and where the crew will be met and taken to the patient.
